

Fox Prints Backhoe Terms

This information is provided to aid in part selection; this does not replace equipment manufacturer's instructions. Always read, understand and follow manufacturer's instructions for disassembly, repair, reassembly & operation. We do not provide instructions with our seal kits, you must obtain service information from the equipment manufacturer.

Cylinders are named for the part of the machine they move i.e. backhoe bucket &/or the type of movement they cause i.e. backhoe swing or boom lift etc. The front loader bucket is sometimes also called the shovel (JCB). Hydra leveling cylinders are not the cylinders that lift the loader boom, they are used to automatically keep the loader bucket level when lifting & lowering. Many Case tractors also have a 3 point hitch & will have Lift, pitch & tilt cylinders.
