

This information is provided to aid in part selection; this does not replace equipment manufacturer's instructions. Always read, understand and follow manufacturer's instructions for disassembly, repair, reassembly & operation. We do not provide instructions with our seal kits, you must obtain service information from the equipment manufacturer. Winking fox logo TM Fox Prints, Fox Machine.

Typical Case style 2 piece piston packing also known as a bi-directional vee set, bi-direction because it seals in 2 directions

Center bearing/ adapter acts as both piston wear bearing and vee set top adapter, note groove for vee set to nest into.

Vee set called "vee" due to the chevron V profile of the rings

Bottom adapter rings nest into the vee rings. Adapters are normally rigid glass reinforced nylon, but Vee material can vary greatly.

Same Vee set assembled
