Cylinders are named for the part of the machine they move i.e. bucket &/or the type of movement they cause i.e. boom lift. Thumbs & twist-o-wrist cylinders are add on equipment & generally not listed as they could be mfg'd by many vendors. Many blade cylinder kits are available, but be aware that these kits are for OEM blades & will not fit add on aftermarket blades, even if it was installed by your dealer prior to delivery, it may still be an aftermarket add on blade & not original equipment.
