

This information is provided to aid in part selection; this does not replace equipment manufacturer's instructions. Always read, understand and follow manufacturer's instructions for disassembly, repair, reassembly & operation. We do not provide instructions with our seal kits, you must obtain service information from the equipment manufacturer. Winking fox logo TM Fox Prints, Fox Machine.

Urethane U-Seals, called "U" seals because of their U shaped profile, are typically used as the main rod seal. U-seals come in many varieties & colors. Loaded u-seals have an o-ring embedded in the U recess to provide constant pressure on the seal lip even at very low oil pressures. Most newer equipment uses standard a u-seal in the rod gland. Chances are the color of a replacement u-seal will differ from the color of the one removed, this is irrelevant to its function though.
